I am composing an article and tape making thread soon. Please use this as a guide and seed this topic/thread with your own experiences. This is what I propose to record and file in the form of a thread: 2) A full list of game mechanics, including exact terms with Japanese or English translations 3) How to approach a fight, with and without tactics 4) What kind of gear you need or best ways to earn. This will also help players here in finding a premade that fits them. I look forward to all your input. -Ballz4 Main shooters and bodyguards galore to kill. They are likely to leave your job if they find out you've been sending them some bread.Q. Can I take huge hits?A. Sure. Though shooting can be dangerous, you can also fight with precision. Don't tell anyone, but you can charm a boss. It works particularly well against the bigger boss characters, taking out huge swathes of them at a time.
