Dec 3, 2021 - If, like many of us, you keep hours of home movies on old VHS tapes, you're in danger of losing that precious movie footage forever. For years, when we burned DVDs to our VHS players, we didn't think it was a problem. But now that we have new technology on our hands, including, for example, Blu-ray and Amazon Fire TV Stick, we worry about the prospect of losing video from the digital environment. These days, everyone can watch DVDs digitally, with Blu-ray, and download and play digital videos and files. But these technologies do not provide reliable long-term video storage.

Phylogeny and biogeography of *Homalopoma sclerodes* (*Homalopoma*, *Dissoconcha*). The shells of *Homalopoma sclerodes* (*Homalopoma*, *Dissoconcha*) were analyzed using thin sections of samples from Colombia and Costa Rica and from the type locality, Cuba. The results indicate that the species is restricted to the Caribbean, and that its current range is the result of a recent eastward range expansion after its previous westward invasion in the Miocene. Phylogenetic analysis suggests that *H. sclerodes* is a basal species of the *Homalopoma* genus.

Self-monitoring of blood glucose as a reminder to take insulin. To determine the impact of self-monitoring of blood glucose (SMBG) on patients' beliefs, knowledge, and experiences. A six-item questionnaire was used to survey 10 diabetic patients before beginning SMBG and again after a 2-week trial of SMBG. The questionnaire was based on control theory (Deci & Ryan, 1985) and viewed diabetes control as a discrepancy between beliefs and behavior. The questionnaire was divided into six sections. Section I (Positive Experience, Aims, and Self-regulation) was based on the control theory. Section II (Beliefs and Values) comprised 6 items investigating diabetes-related beliefs and values. Section III (Knowledge) consisted of 6 items of increasing difficulty. Section IV (SMBG and Behavior) asked patients to note the degree of control they felt over their diabetes and to note the times and at what times they checked blood glucose. Section V (Factors that Influence Control) investigated self-regulation of diabetes-related behaviors. Section VI (Barriers to Control) consisted of 5 items asking patients to list

barriers to control of diabetes. The 6-week trial of SMBG resulted in significant differences in scores. Patients reported increased knowledge and self-efficacy and decreased positive beliefs about their diabetes following SMBG c6a93da74d
